1. Applicant's election of species A (Fig. 1) is acknowledged, with claims 1, 8, 10 and 11 readable thereon. Claims 2-7, 9 and 12-28 are therefore withdrawn from consideration.

2. Claims 8, 10 and 11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, these claims not been further treated on the merits.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kaenel et al.

See Fig. 4a and the corresponding discussion thereof, especially column 6, lines 50+ where it is discussed that current IDO flowing through FET 24 is maintained constant. The recited monitor means reads on element 21, and the recited regulating means reads on the combination of elements 22 and 23.
